CASE STUDY

Client: Remondis
Location: Hillsdale, NSW

> I can vouch for the efficiency of these Roto Compactors. Great units, Craig! Keep making those great compactors, and associated equipment. You Guys have a great product, and good back up.

Pete Johnson | Fleet and Equipment Manager
Remondis

CHALLENGE

Ideally nestled in the heart of Hillsdale, on Bunnerong Road, Southpoint Shopping Centre provides convenience, a variety of quality fresh food operators, cafe, beauty and health, fashion and service retailers along with a food court. It also boasts a full-line Woolworths, Aldi, TK Maxx, Chemist Warehouse and over 25 specialty stores.

Remondis were engaged by Southpoint Shopping Centre to supply waste services for the centre. Space being at a premium, the waste consolidation zone was very restricted in both available footprint and access.

Increasing general waste and cardboard waste streams were becoming a significant challenge.

SOLUTION

Remondis turned to Waste Initiatives as their equipment specialist for recommendation of a compact solution to manage the increasing general waste and cardboard volumes the site was generating.

After a site assessment and detailed measure-up was completed, Waste Initiatives equipment specialists recommended a high-force 15m3 RP30 waste compactor & bin lifter combination for the general waste, and a special purpose APS1100 Roto-Compactor for the cardboard waste stream.

The installation was an overwhelming success, freeing up additional space and reducing the centre's cost of waste managment thanks to the high bin payloads of up to 10T!
