

The Aussie-made Versatip bin lifter ensures swift, safe emptying of diverse wheelie bins for single operators. Widely used in waste management, construction, education, mining, retail, and healthcare, it offers reliability and efficiency across industries.

versatip

Quality

The Versatip Wheelie Bin Lifter, made in Australia, emphasizes safety and quality for industrial bin tipping.

Ergonomics

Versatip bin tipper designed for ergonomic operation, reduces manual handling risks for wheelie bins.

Safety

Versatip prioritises operator safety with class-leading features without compromising speed or efficiency.

Features

- Tip height options from **1200 to 2400 mm tip**.
- Versatile design accommodates mobile rubbish bins from **80 to 360 litres**, and up to **250 kg (SWL)**.
- Bin cradle returns to ground level, eliminating the need to lift the bin into a bin tipper.
- Bin securely held by wheels, no need for strapping or restraints.
- Full height door for easy loading and unloading of the bin.
- High quality castors with low rolling resistance for excellent maneuverability.
- Two push handles at the rear for secure and ergonomic grip during movement.
- Built-in forklift pockets for safe transportation of the bin lifter if needed.
- Full-height guarding with foot guards for safety.
- Dual hand controls ensure proper operator positioning.
- Interlocked door prevents operation when open.
- Keyed on/off switch for control access.

Options

- **Flexible power options:** battery, solar, single phase, and 3 phase electric.
- **Customizable tip height options** for diverse bin emptying needs.
