

The Eagle Punch Cutter efficiently splits Off-the-Road (OTR) tyres down the centre of the tread, handling sizes from 39-inch rims up to 14-foot diameters. Equipped with a programmable logic controller (PLC), it operates automatically or manually, rotating around the tyre and cutting 5-inch sections with a 7-inch blade.

Loaded against the tyre with a telehandler, this machine is ideal for Australian facilities focused on downsizing large OTR tyres. Its precision cutting minimises rubber mess, ensuring a clean and straightforward downsizing process.

Features

- Up to 8 minutes per tyre cycle time
- Durable heat-treated alloy punch blade
- Punch cuts up to 8 inches per operation
- Clamp cylinder to allow removal of broken beads
- Max. Tyre Capacity: 70/70-57

Options

- Power options of Diesel or gas

Specifications

	Punch Cutter
Height	2 080 mm
Width	1 600 mm
Length	3 200 mm
Approx Weight	2 041 kg
Axles	Single
Minimum Tyre Capacity	Rim Size 39"/Tread Width 37"
Maximum Tyre Capacity	14' diameter OTR
Cycle Time	8 mins p/tyre
Diesel	23 HP isuzu
Blade size	10" / 25.4 cm wide
