VERTECH SORTING SYSTEMS

VER122C+
MOBILE PICKING STATION

PRODUCT SPECIFICATIONS

The VER122C+ is an extended 2 bay mobile picking station designed for increased throughput and longer picking platform coverage.

With an extended chassis, 1000 mm variable speed conveyor and integrated 35 kVA power system, it delivers greater picking capacity while maintaining compact transport dimensions.

Features

- 2 picking bays with 4 discharge chutes
- Extended picking platform for improved throughput
- 1000 mm picking belt width
- On-board 35 kVA generator including fuel pump
- Air knife blower system for light material separation
- Overband magnet for ferrous metal removal
- Telescopic legs to raise machine for skip access
- Electrical control panel with user friendly interface
- Air-conditioned cabin with anti-slip flooring, heating and lighting
- Emergency stops and pull cords in cabin
- Walkways with ladders for cabin and service access
- Robust steel construction with durable coating
- Easily transported via low loader

Options

- Suction or blowing fan system positioning
- Overband magnet positioning
- Air conditioning upgrade
- Plain or chevron belt

Picking Bays
2 Bays,
4 Materials

Motor
35 (kVA)

Waste Types
C&D, C&I, Municipal, Commingled, FOGO
