

The VER122M is a heavy-duty mobile 2 bay picking station designed for efficient material separation across a wide range of applications.

It enables recovery of multiple waste streams on site, all from the safety and comfort of the enclosed air-conditioned cabin.

Features

- 2 picking bays with 4 discharge chutes
- 1200 mm picking belt width
- On-board 44 kVA generator including fuel pump
- Air knife blower system for light material separation
- Overband magnet for ferrous metal removal
- Telescopic legs to raise machine for skip access
- Hydraulic controls for rapid setup
- Air-conditioned cabin with anti-slip flooring, heating and lighting
- Emergency stops and pull cords in cabin
- Wheeled axle and fifth wheel coupling for site mobility
- Engine bay access from ground level
- Robust steel construction with durable coating

Options

- Suction or blowing fan system positioning
- Overband magnet positioning
- Air conditioning upgrade
- Plain or chevron belt

Picking Bays
2 Bays,
4 Materials

Motor
44 (kVA)

Waste Types
C&D, C&I,
Municipal,
Commingle, FOGO

DIMENSIONS		MODEL VER122M
Transport Width (mm)		3,520
Transport Length (mm)		16,570
Transport Height (mm)		3,455
Working Width (mm)		3,520
Working Length (mm)		16,200
Working Height (mm)		5,790
Dry Weight (kg)		15,500
PICKING BAYS		
No. of Bays		2
Capacity		up to 4 Products
BELT		
Width		1200 mm
Speed		Variable Speed Control (VSC)
POWER		
Power Options		Diesel generator / Plug-in Electric
Diesel Generator		Kubota 44 kVA
OPTIONS		
Belt		Plain or Chevron Belt
Fan Type		Suction or Blowing
Overbelt Magnet		before or after picking
Air Conditioning		Yes
